Th MAILING DATE of this communication appe	ars on the cover sh t with the o	correspondence add	ress				
THE REPLY FILED 30 July 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.							
PERIOD FOR RE	PLY [check either a) or b)]						
a) The period for reply expiresmonths from the mailing date of the final rejection.							
b) The period for reply expires on: (1) the mailing date of this Adv event, however, will the statutory period for reply expire later the ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS 706.07(f).	an SIX MONTHS from the mailing date o FILED WITHIN TWO MONTHS OF TH	f the final rejection. E FINAL REJECTION. \$	See MPEP				
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
1. A Notice of Appeal was filed on Appellant's 37 CFR 1.192(a), or any extension thereof (37 CF							
2. The proposed amendment(s) will not be entered be	ecause:						
(a) Method they raise new issues that would require further	er consideration and/or search	(see NOTE below);					
(b) they raise the issue of new matter (see Note b	pelow);		•				
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or							
(d) they present additional claims without cancel	ing a corresponding number of	finally rejected clain	ms.				
NOTE: See Detailed Action.							
3. Applicant's reply has overcome the following rejection(s):							
4. Newly proposed or amended claim(s) would canceling the non-allowable claim(s).	be allowable if submitted in a s	separate, timely file	d amendment				
5. The a) affidavit, b) exhibit, or c) request fo application in condition for allowance because:		sidered but does No	OT place the				
6. The affidavit or exhibit will NOT be considered becaused by the Examiner in the final rejection.	cause it is not directed SOLELY	to issues which we	ere newly				
7. For purposes of Appeal, the proposed amendment explanation of how the new or amended claims we			and an				
The status of the claim(s) is (or will be) as follows:							
Claim(s) allowed:							
Claim(s) objected to:							
Claim(s) rejected: <u>1-15</u> .							
Claim(s) withdrawn from consideration: 16-27.							
8. The proposed drawing correction filed on is	a) ☐ approved or b) ☐ disap	proved by the Exan	niner.

DETAILED ACTION

Response to Amendment

1. The proposed amendment filed on 7-30-03 has not been entered because it raises new issues that would require further consideration.

Response to Arguments

2. Applicant's arguments filed 7-30-03 have been fully considered but they are not persuasive. It is noted that the applicant's arguments are mainly drawn to the non-entered amended claims filed on 7-30-03.

The applicant's arguments, however, seem to center on whether or not it is inherent in the process of Donald that the orientation occurs when the material is inbetween its glass transition temperature and its melting temperature. It is the examiner's position that in order for orientation of the polymer to occur that the material would be required to be in-between these two temperatures. The teachings of the text of *PHYSICS OF PLASTICS* cited by the applicant do not refute this position. Wang et al. (U.S. Patent No. 5,951,494) teaches that the orientation of a polymer takes place at a temperature above the glass transition temperature but well below the melting point (Column 8, lines 54-57). It is well known in the art that a melted polymer (at a temperature above the melting point of the polymer) would not retain any applied orientation because the polymer chains would immediately slip past each other and the material would remain non-oriented. It is further well known in the art that a material below the glass transition temperature would be resistant to any type of orientation.

Application/Control Number: 09/898,710

Art Unit: 1732

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey P. Shipsides whose telephone number is 703-306-0311. The examiner can normally be reached on Monday - Friday 9 AM till 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni can be reached on 703-305-5493. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661
